

# UNLIMITED CARD PAYMENT POSSIBILITIES

## Credit Card Processing Card Payment Solution

### About Credit Card Processing

For merchants who wish to implement credit card payment options, CashRun's Credit Card Processing is the right solution. With our partnering card acquirers, merchants will be able to process card payments on their websites, and receive support from application to integration and usage.

### How Credit Card Processing Works

Credit Card Processing gives merchants the capability to collect credit card payments directly through CashRun's card acquirer partners.

Through a 3-step process, merchants are able to vastly expand the payment possibilities they can offer to their customers.

**1. Application** - Merchant applies through CashRun for account with card acquirer. Results will be known within 5 working days.

**2. Integration** - Once application is successful, CashRun will assist merchant with integrating Credit Card Processing on their websites.

**3. Support** - After integration, CashRun will support merchant for day-to-day operations and billing purposes.

CashRun will assist the merchant through the whole process, and provide know-how to enable the merchant to integrate the card payment mechanisms into their sites.

### Benefits of Credit Card Processing

#### *All Customers Accepted*

CashRun's Credit Card Processing solution is able to accept all major credit and debit cards, including VISA, MasterCard, Diners Club International, American Express, Maestro, and GiroPay.

#### *Safe and Secure*

All credit card processing transactions are secured with at least a 128-bit SSL encryption, making it extremely difficult for hackers to procure sensitive customer and transaction details.

#### *Speed Matters*

Transactions using credit cards are fast and effective, unlike other payment methods such as bank transfers.

#### *Different Currency Support*

A merchant will be able to accept payments in any forms of currency depending on their location.

#### *Demographics*

Using Credit Card Processing, a merchant will gain access to statistics of customers such as age, location, as well as managing your cashflow better through an overview of revenue, processing expenses, etc.

#### *Uptime*

CashRun utilizes enterprise-grade datacenters and high-volume transactions servers, ensuring that uptime is excellent, and server breakdowns are covered by extensive redundancy and backup strategies.

**With Credit Card Processing, merchants are able to provide an effective, safe, and secure payment option used by millions of consumers worldwide. Strong multi-currency support expands your potential market to all corners of the world.**
